

Ezy Imaging Suite

Leverage truly unique, innovative and powerful document capture, imaging and printing solutions

Our **Ezy Imaging Suite** of 6 products are Enterprise-class Document Capture, Imaging and Printing solutions that allow you to perform capture, storage, retrieval, viewing, manipulation, transformation, editing, annotation, printing and processing tasks for complete document and content management integration needs within Oracle Forms, Oracle Apex, Oracle ADF, JSP, JSF, OAF, .Net, PHP, Formspider, Ruby and other web-based applications.

FREE Evaluation Version of 30 Days for all products is available from our website:

<https://www.longbridge.biz/products/>

Just click on each product's URL Link to go to the individual product page where you will be able to download the relevant Zip file within the web page.

For non-Oracle Forms and non-Oracle Apex web applications, we can provide a sample JSP application that can be used as a baseline to copy the relevant JavaScript functions and HTML code that can be modified to suit your own application requirements.

Ezy Imaging Suite products:

1. **Ezy Image Capture** – Allows capture of imaging documents from TWAIN compatible scanners, webcams & digital cameras & store these in BMP, GIF, JPG, PNG or TIF file format into several possible repositories such as Local Client Machine folder(s), Shared Network folder(s), Web/Application Server folder(s) and/or Database Server table(s).
2. **Ezy Image Manager** – Retrieve, manipulate, edit and transform imaging documents from any of the supported repositories to view and update these documents, if required.
3. **Ezy Image Print** – Allows imaging documents to be retrieved from any of the supported repositories and directly sent to the default or target printer, without any Print Dialog to be shown. This is useful for sensitive and confidential documents to be printed directly and not allow the end users to save a local copy on their own local machine for whatever purpose. An option exists to also show a Print Dialog, if required, for non-sensitive documents.
4. **Ezy PDF Capture** – Allows capture of PDF documents from TWAIN compatible scanners, webcams & digital cameras & store these into several possible repositories such as Local Client Machine folder(s), Shared Network folder(s), Web/Application Server folder(s) and/or Database Server table(s)
5. **Ezy PDF Manager** – Retrieve, manipulate, edit and transform PDF documents from any of the supported repositories to view, annotate and update these documents, if required.
6. **Ezy PDF Print** – Allows PDF documents to be retrieved from any of the supported repositories and directly sent to the default or target printer, without any Print Dialog to be shown. This is useful for sensitive and confidential documents to be printed directly and not allow the end users to save a local copy on their own local machine for whatever purpose. An option exists to also show a Print Dialog, if required, for non-sensitive documents.

Customer Testimonials

**Michael Timmons, Oracle Applications Manager
International Registries Inc, Virginia, USA**

"LongBridge's solution has allowed us to rapidly develop applications for Records and Document Management. The flexibility and feature rich solution gives us many options to meet our varied business requirements. The ease of use and the customer support of LongBridge greatly enhance this product."

**Mick Whitworth, Oracle Applications Project Manager
Cayman Islands Government**

"A couple of years ago we were scouring the market looking for a java based scanning solution that we could seamlessly integrate with our back-end Oracle Forms and ECM systems. LongBridge's solution allowed us to incorporate this scanning functionality into our existing Oracle Forms applications."

The original solution was absolutely fit for purpose but as our customers started to use the new functionality it didn't take long before they were requesting additional functionality. LongBridge responded almost immediately by adding extra functionalities to the existing solution and we now have a fairly comprehensive Document Capture & Image Processing solution tailored to our specific customer needs.

The people at LongBridge have been a pleasure to work with and we have a great working relationship with them. Their product is competitively priced and fits our needs perfectly. They are always looking to extend the functionality of their product set and I would not hesitate to recommend them to other organisations."

**Andrés Medrán, Senior Oracle Consultant
Fondo de Garantía Salarial, Madrid, Spain**

"We are using LongBridge's solution for document visualization in our forms based applications, where we needed a simple, but yet productive & efficient solution for TIFF files processing on web browsers, and their solution does the job perfectly."

As a public government entity with thousands of documents in our database records, our application is used by operators to collect and check document data, thus fulfilling our needs to further automate the business processes to achieve our Document Management objectives."

R Sankaranarayan, Senior General Manager IT
Housing Development Finance Corporation, Mumbai, India

"LongBridge's solution has allowed us to rapidly develop our own Document Management applications offering scanning and image view/scroll web-based applications using Forms 11gR2.

Varied features within their solution have allowed us to meet our requirements for our Fixed Deposit application.

LongBridge's Customer Support is undoubtedly one of the best when it comes to a quick turnaround to resolve any issues that we had faced as well as requesting for change requests.

Asif Rafique, General Manager IT
Gadoon Textile Mills Limited, Karachi, Pakistan

"LongBridge's solution is a great product for those who are running Forms applications on Oracle platform and want to develop or enhance their Document / Content Management System.

The product is packed with many productive features such as image / page navigation; storage and retrieval of images through various repositories; seamless integration with any TWAIN based scanner, and many more functionalities.

We would like to also acknowledge the elite support of the product. The team at LongBridge truly cares about customer satisfaction and repeat business. It shows in how responsive they have been when customer specific problems arise.

Overall we have good experience with them in terms of their product benefits and their ultimate pre and after sales support."

We are here to work together with you to resolve your IT problems successfully and provide more efficient, productive and cost competitive services and solutions.
